+1 (443) 766-2382 – U.S. Citizen

EDUCATION

Georgia Institute of Technology

Bachelor's of Science in Computer Science, Major GPA: 3.63

Atlanta, GA

Aug 2020 – May 2024

Concentration: Graphics & Systems Engineering/Networking

Courses: *Systems and Networks, Intro to Databases, Algorithm Design, Computer Graphics, Computer Architecture, Applied Combinatorics, Linear Algebra, Data Structures & Algorithms, Object-Oriented Programming*

EXPERIENCE

NCR Corporation

Incoming Software Engineering Intern

Atlanta, GA

May 2023 – Aug 2023

Georgia Tech Research Institute

Research Assistant

Atlanta, GA

Aug 2022 – Present

- Transitioned emergency procedure manual iPad application to React webpage with newer features
- Developed Python script to parse styling information from Excel sheet database in order to render on webpage
- Enhanced user experience by adding features to allow for adding, removing, and editing of emergency manuals

Georgia Tech Research Institute

Research Software Engineering Intern

Atlanta, GA

May 2022 – Jul 2022

- Assisted in identifying issues with user-uploaded ML models by developing an error analysis visualization tool
- Iterated continuously on various dashboard designs and visualizations to maximize user experience with React
- Designed data architecture to allow seamless communication with database in Flask and pandas

Johns Hopkins University Applied Physics Lab

Software Engineering Intern

Laurel, MD

Jun 2018 – Jun 2020

- Reduced average time for locating parking spot on APL campus with OpenCV and image recognition
- Dispatched analyzed parking spot data to drivers gathered through mobile app
- Experimented with relationships between emotional context and television subtitles using NLP techniques
- Developed lost device tracking system with Raspberry Pi by building Pseudo-GPS system with WiFi networks

EXTRACURRICULARS

GT Esports

Vice President, Head of Creative Department, Treasurer

Atlanta, GA

Sep 2020 – Present

- Restructured organization by interviewing/onboarding new staff and creating new procedures
- Boosted and promoted member engagement by implementing policies to increase member participation
- Managed creative team of 7 creating website, social media, and game-specific designs
- Integrated creative department into game sub-organizations to produce ad-hoc graphics for large events
- Managed budget and allocated funds for competitive teams, various events, and organization costs

PROJECTS

gamelettr | *Python, Websockets, Event Handling, REST APIs*

- Provided quick tournament lookup information for regional and global events through Discord bot
- Consumed Riot Games Esports API to get accurate, live tournament information
- Utilized formatting algorithms with data structures to display information sent to Discord using `discord.py`
- Developed a scheduler to deliver notifications with a stream link for upcoming matches for ease of viewing

Energy Consumption Analysis (2020 HackGT 7) | *Dash, Plotly.js, pandas, NumPy*

- Built to a decision tree anomaly detection model built to detect energy usage anomalies
- Visualized data output by from decision tree using Plotly graphs and a Dash app

SKILLS SUMMARY

Programming: Python, Java, JavaScript, TypeScript, OpenGL, HTML/CSS, SQL, C, \LaTeX , Assembly
Tools: Figma, Notion, Trello, Git, Adobe Photoshop, Tableau
Technologies: Websockets, API, Event Handling, React, Flask
Languages: English (native), Chinese (fluent)
